Subject Index

activities, olivine/plagioclase components 260f.
albite, activities 263
alkali basalt, ascent rates 221
–, ultramafic xenoliths 54f.
alkali basalt intrusions, N.S. Wales 173
alkali feldspar 114, 175
–, picrites 391
alkaline magmas, volatiles 217ff.
alkali olivine basalt, teschenite sills 181
$Al_2O_3-SiO_2-H_2O$, phase diagram 9
Al–Si disorder, margarite 336
Al_2SiO_5, isograd reactions 255
amphibole 73, 114, 177, 281
amphibolite 270, 349
analcime, teschenite sills 175
andalusite, thermodynamic properties 17
andesite 135f., 165, 205
ankaratrite 204
ankerite, carbonatite 234
anorthite, activities 263
–, phase equilibria 1ff.
–, synthesis 5
–, thermodynamic properties 17
antiperthite, granulites 103
apatite 175, 341
–, carbonatite 233
apophyllite 9
arc picrites 386ff.
assimilation 131
augite 135
–, picrites 390
–, ultramafic xenoliths 61

Ba, Mauna Ulu eruptions 31
backarc basin tholeiites 165
barroisite 341
basalt origin, case studies 24ff.
–, Laguna del Maule lavas 146f.
basalts, Brazilian coast 309f.
–, ultramafic xenoliths 54f.
batholiths, Favourable Lake area, U–Pb dating 87ff.
beforsite 233f.
Benioff zone, Nazca Plate 133
bicchulite, thermodynamic properties 17
biotite 54, 114, 136, 175, 271, 355
biotite diorite 41
blue schist facies, geothermometry 340f.
blueschists, Sifnos 152f.
boninites, Victoria, geochemistry 164ff.
burial metamorphism, greenstone belts 165

Calcite 300
–, carbonatite 234f.
carbonatites, microstructures 233f.
$CaSiO_3$, high pressure polymorph, preparation 1ff.
$CaSiO_3-H_2O$, phase diagram 9
cataclasis, granitoids 289
cavity-wall reactions, fluid inclusions in upper mantle minerals 79
charnockites, geothermometry 64f.
–, Nigeria, U–Pb ages 188f.
chemical analysis
–, amphibole, teschenite 178
–, analcime, teschenite 175
–, andesite, greenstone belts 166
–, basalt, rift zones 314
–, –, Summit Lake 54
–, biotite, granulite 272
–, boninites, greenstone belts 166
–, chilled margin, teschenite 183
–, chlorites, slate 375
–, clinopyroxene, picrites 391
–, –, teschenite 177
–, –, ultramafic xenoliths 57
–, clinopyroxene/garnet pairs, Sesia Zone 341
–, cordierite, granulites 107, 272
–, feldspars, Colima 210
–, –, granulites 108
–, –, teschenite sills 175
–, Fe–Mg ferrite, spinel lherzolite 199
–, Fe–Ti oxides, teschenite 179
–, garnet, charnockites 68
–, –, granulites 107, 272
–, granite, Bottle Lake 115
–, granulites, Sipiwesk Lake 104
–, hornblende, Colima lamprophyres 208
–, ignimbrite minerals 364
–, illites, slates 364
–, kalsilite, Colima lamprophyres 210
–, lamprophyres, Colima 212
–, margarite 300
–, metaperidotites, Thompson Belt 349
–, micas, teschenite 178
–, muscovite 300
–, nepheline, Colima lamprophyres 210
–, olivine, picrite 390
–, –, spinel lherzolite xenoliths 199
–, –, ultramafic xenoliths, minerals 56f.
–, orthopyroxene, charnockites 68
–, –, granulites 107
–, –, spinel lherzolite xenoliths 199
–, phenocrysts, Laguna del Maule lavas 137
–, phlogopite 300
–, –, Colima lamprophyres 208
–, –, granulites 108
–, picrite groundmass, Solomon lavas 394
–, plagioclase, charnockites 68
–, plagiogranites, Karmoy 43
–, sapphirine, granulites 105
–, sillimanite, granulites 107
–, sphene 300
–, spinel, granulites 107
–, –, picrites 393
–, –, ultramafic xenoliths 59
–, teschenites, N.S. Wales 180
–, tholeiite, greenstone belt 166
–, ultramafic xenoliths, minerals 56f.
–, ultramafitites, Thompson Belt 349
chilled margin, teschenite sills 183
chlorite, replacement of phlogopite 301
chlorite-vermiculite intergrowths 372
chrome diopside, ultramafic xenoliths 60
chromite, Colima lamprophyres 205
cinder cone suite, Colima 211
clinopyroxene 54, 135, 176f., 204, 280f.
–, upper mantle xenoliths, fluid inclusions 75
clinozoisite, phase equilibria 1ff.
CO_2, alkaline magmas 217ff.
condensation, solar nebula 131
contact metamorphism, model 252f.
cordierite 271, 355
–, granulites 103
corundum, granulites 103
–, phase equilibria 1ff.
–, synthesis 5
–, thermodynamic properties 17
Cr-diopside, upper mantle xenoliths 72f.
crustal contamination 313
crystal fractionation, ignimbrite petrogenesis 368
crystal fractionation model, rhyolites 143
crystallinity, magma, ignimbrites 363
crystallization sequence, ignimbrites 363f.

Dacite 135, 165
defects, dolomite 238
dehydration melting, granulite transition 269f.
dehydration reaction, material transport 254
D/H, granulites 288ff.
diapir, magma 225
diaspore, thermodynamic properties 17
differentiation, teschenite sills 184
diffusive transport, metamorphism 251
diopside, picrites 390
discordance, zircons 322
dislocations, carbonatite minerals 236ff.
dissolution rate, metamorphism 247
dolerites, greenstone belt 165
dolomite, carbonatite 236f., 300
–, –, fringed effects 238

Eclogites, Sifnos 151
enderbites 68
epidote 153
equilibration temperatures, ultramafic xenoliths 61
Eu anomaly, plagiogranites 47

Fayalite, activities 263
Fe^{2+}/Fe^{3+} estimation, methods 342
feldspars, teschenite sills 175
ferrite, symplectites 196f.
flow theories, magma ascent 222f.
flow transport, earth crust 251
fluid, mantle metasomatic 218f.
fluid dynamics, two-phase flow, magma ascent 222
fluid equilibration rate, metamorphism 257
fluid phases, sampling techniques 276f.
–, upper mantle 72ff.
fluid production, earth crust 249f.
fluorite, carbonatite 233
flysch 165, 355
forsterite, activities 263
–, ultramafic xenoliths 55
fractional crystallization, Laguna del Maule lavas 144

–, rift zone basalts 316
–, teschenite sills 185
fugacity determination 277

Gabbro 41
garnet 271, 341, 356
–, solid solution, Sesia Zone 344
garnet-clinopyroxene geothermometry 340f.
gehlenite, thermodynamic properties 17
geochronology, Bottle Lake Complex 115f.
–, Favourable Lake area 91f.
–, U–Pb uncertainties 322f.
geothermometry, charnockites 64f.
–, comparative for granulites 67
–, garnet-clinopyroxene 340ff.
–, ignimbrites 363
–, olivine/plagioclase components activities 260f.
–, Sifnos high-pressure metamorphics 154f.
glaucophane 153, 341
–, Sifnos, O-isotopes 155
gneiss 87, 189, 270
–, Sifnos 151
graben, Colima 204f.
grain boundary diffusion, metamorphism 251, 256
granites 189f.
granodiorite, U–Pb dating 87f.
granulites, comparative geothermometry 67
granulite metamorphism 70
granulites, sapphirine-bearing 102f.
–, xenoliths 280f.
granulite transition 269f.
graphite 300
greenschist unit, Sifnos 152f.
greenstone belt, Victoria, boninites 164f.
grossular 404
–, phase equilibria 1ff.
–, synthesis 5
–, thermodynamic properties 17
growth rate, metamorphism 247
gyrolite 9

Hawaiite, teschenite sills 181
heat transfer, magma ascent 226
HF fugacity, experim. determination 276f.
H isotopic data, Nevada granitoids 292f.
H_2O, solubility in melts 228
hornblende 136, 204
hornblende-lamprophyre 205
hornblendite 87
hybridisation, upper mantle 319

Ignimbrites, magma source 369
ignimbrite suite 354ff.
illite, mudstone and slate, composition 374f.
inclusions, upper mantle minerals 74f.
incompatible elements, picrites 397
interlayers, clay minerals 372f.
interphase boundaries, calcite-dolomite in carbonatites 241
interstratified clay minerals 372ff.
intracaldera ignimbrites 355f.
island arc, Nazca 133f.
isograd reaction, contact metamorphism 254
–, metamorphism 255

Jadeite gneiss, Sifnos 155
jadeitic pyroxenes, solid solutions 340f.

Kaersutite 179
Kalsilite, Colima lamprophyres 209
Kaolinite 9
–, thermodynamic properties 17
K-feldspar 271
–, granulites 103
kimberlites, magma ascent 220f.
komatiite 351
kyanite 9, 404
–, thermodynamic properties 17

Lamprophyres, Colima 204ff.
–, origin 211f.
lava flows, Laguna del Maule 135
lavas, lamprophyric, Colima 203ff.
–, Solomon Isl. 388f.
lawsonite, phase equilibria 1ff.
–, synthesis 4
–, thermodynamic properties 17
leucite 54

Magma ascent, rates 220f.
–, temperatures 219
magma heat death 218
magma mixing, ignimbrite petrogenesis 367
magma temperatures, ignimbrites 363
magnetite 135
–, Sifnos, O isotopic composition 155
mantle material, partial melting, ultramafitite genesis 352
mantle metasomatism 72, 81f., 217
mantle source, rift zone basalts 316
marble, Sifnos, O isotopic comp. 159
margarite 300
–, phase equilibria 1ff.
–, synthesis 5
–, thermodynamic properties 17, 337
margarite + quartz, P-stability 332ff.
melting, system $K_2O-CaO-Al_2O_3-SiO_2-H_2O$ 403f.
–, upper mantle 319
melts, volatile contents as function of P and vol. compos. 229
metamorphism, subduction-related, Sifnos 150f.
metasomatism, boninite petrogenesis 164f.
–, mantle 82
Mg-calcite, carbonatite 233
micas, interlayering 372f.
–, teschenite sills 179
microthermometry, fluid inclusions in upper mantle xenoliths 76f.
mixed layers, clay minerals 372f.
mobility, rare earth elements, metamorphism 328f.
model, thermodynamic, system $CaO-Al_2O_3-SiO_2-H_2O$ 15
monzonite 87
mudstone, illites 374
mugearite, teschenite sills 181
muscovite 404

Nazca plate, S. America 133f.
Nd isotopic data, boninites 166
–, Laguna del Maule lavas 140f.
–, Mauna Ulu eruptions 26f.
–, tholeiites 168
nepheline, Colima lamprophyres 209
Ni, xenoliths, Birket Ram 284
nodules, alkali basalts 280f.

Oceanic plagiogranites, Karmoy 36f.
O fugacity, effect on activities 267
O isotope geothermometry, Sifnos metamorphics 154f.
O isotopic data, Nevada granitoids 292
okenite 9
olivine 54, 135, 176f.
–, activities of components 260f.
–, Solomon lavas 388f.
–, upper mantle xenoliths 72f.
olivine fractionation, basalts, Mauna Ulu 24f.
olivine/liquid partitioning, trace elements 126ff.
–, –, thermodynamics 129f.
olivine oxidation, symplectite formation 196f.
olivine teschenite 174f.
omphacite 341
–, Sifnos, O isotopic comp. 155
omphacitites, Sifnos 152f.
orthoclase 271, 355
orthopyroxene 55, 135, 356
–, granulites 103
–, symplectites 196f.
–, upper mantle xenoliths 72f.
orthopyroxene-garnet thermometer, charnockites 64f.
ophiolite suite, Karmoy, plagiogranite origin 36f.
oxidation symplectites 197f.

Paragonite 341
parametric programming 16f.
parental magma, picrites 396f.
partial melting, boninite petrogenesis 164f.
–, charnockites 70
–, picrite petrogenesis 399
–, ultramafitite genesis 352
partial melting model, rhyolites 145ff.
partitioning, trace elements between olivine/liquid 126f.
Pb, radiogenic in zircon 322f.
–, zircons, geochronology 322f.
Pb gain, zircons 324
Pb movement, radiogenic 325f.
peridotites 349, 390
phase equilibria, system $CaO-Al_2O_3-SiO_2-H_2O$ 1ff.
phase transitions, fluid inclusions 77
phengite 341
phenocrysts, ignimbrites 356
–, Laguna del Maule lavas 135f.
–, olivine in picrites 390
phlogopite 179, 204, 300
–, granulites 103
–, stacking phenomena 301
phlogopite-chlorite reaction mechanism 299f.
phyllosilicates, interlayering 372ff.
picrites, Solomon Isl. 388ff.

picro teschenite 174
pistacite 155
plagioclase 54f., 114, 175f., 208f., 271, 282, 355
–, activities of components 260f.
–, granulites 103
–, Laguna del Maule lavas 135
plagiogranites, oceanic, origin 36ff.
plate tectonics, Mexican Belt 204
prehnite, phase equilibria 1ff.
–, synthesis 5
–, thermodynamic properties 17
prograde metamorphism 246f.
programming, linear parametric, thermodynamic data in the system $CaO-Al_2O_3-SiO_2-H_2O$ 14ff.
pseudo-wollastonite, thermodynamic properties 17
pyrophyllite, phase equilibria 1ff.
–, synthesis 4
–, thermodynamic properties 17
pyroxene, teschenite 174
–, ultramafic xenoliths 59f.
pyroxenite, upper mantle xenoliths 73f.

Quartz 114, 155, 271, 300, 341, 355, 404
–, granulites 103
–, thermodynamic properties 17
quartzite 189

Rare earth elements, boninites 166
–, metamorphic mobility 328f.
–, picrites 397
–, rift zone igneous rocks 312
rare earth elements modelling, plagiogranites 49f.
rauhaugite 233f.
Rb–Sr dating, Bottle Lake Complex 116
restite, S-type rocks 361
retrograde metamorphism 299f.
rhyodacite 355
rhyolite 355f.
–, crystal fractionation model 143
rift zone magmatism 307ff.
rosenhahnite, phase equilibria 1ff.
–, synthesis 4
–, thermodynamic properties 17
rutile 300, 341
–, granulites 103
–, Sifnos, O isotopic comp. 155

Sanidine 205, 404
sapphirine, granulites 102f.
sillimanite 271, 404
